

Meetings

In this file, I will include all the proof that I have of having meetings. This will count towards the 'Professional Leadership' learning outcome as it shows a professional skill.

Brainstorm Meeting 05/04/2024

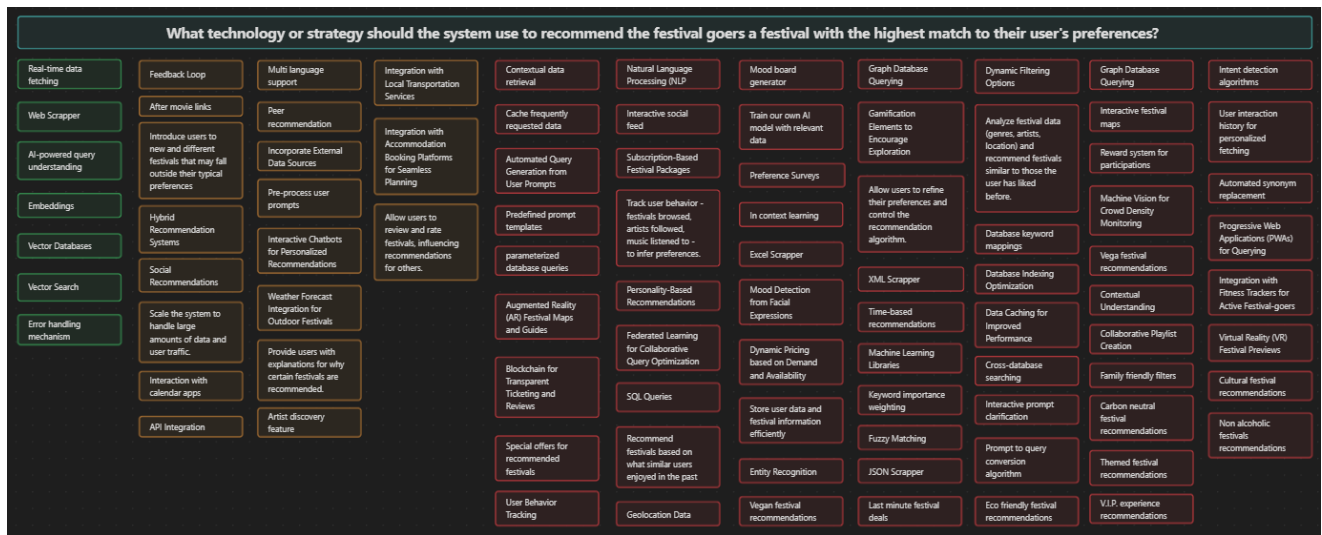

For the research that I was doing for my individual project, I had specified that I wanted to do a brainstorm session about this topic. So, I created a meeting with Brett to plan when we were going to do this.

Meeting Invitation

Meeting

Meeting Conclusion

During this meeting we held a brainstorm session where the question was 'What technology or strategy should the system use to recommend the festival goers a festival with the highest match to their user's preferences?' For this, we created a canvas board in our notes application and started thinking about as much as possible solutions to this problem. After having finished the meeting, I filtered all the ideas based on likeliness to implement and added the brainstorm session to my research file.
